

V5 ALLOY TRAY

From \$7,990+ GST

Our Bronco V5 Tray is the top-tier tray in the Bronco family. Offering features that you cannot find on any other variants, the V5 represents the evolution of Bronco Built trays. Offering everything the V4 has to offer, such as an integrated fuel filler in the headboard, infill side-steps, one-piece flared, and the headboard being water tank-compatible (things you won't find on the V3), our V5 tray also offers the exclusive 'RHS' style headboard and ladder racks, as well as the V5 "integrated" style toolboxes.

* Additional costs may include: freight, longer tray sizes, premium powder coat colours, 2-pack painted finishes, remounting or sensors/camera, removal of "tub" & more.

Standard Features

No, we have a number of standard sizes and lengths that suit most factory vehicles.</p> <p>Can the LED tail lights be fitted for any vehicle? The 355 and 385 have a "sequential" indicator, it races from the inside to the outside like some European cars. This sequential light won't work on all vehicles. It is known not to work on the Amarok, RAM, and Older BT50 (2012-2020). Only Maxilamp lights can be fitted on these models.</p> <p>Do the over-centre latches jam easily? No, Bronco latches do not jam or get stuck, an occurrence which is common on this type of latch when a powder coated finish is applied.</p> <p>Can my tray be shipped for me? Yes, we can ship your tray or canopy to any one of our fitting agents across the country.</p> <p>Notes: some dealerships are also able to fit our trays, we can ship to these locations too.</p>
